

RE: 02-278

This FCC petition should be withdrawn immediately. NO to institutions which want to invade our homes, again, with unwanted, unsolicited phone calls. It stands to reason that, if consumers WANT additional services from one of these institutions, they will ASK for it. More invasions into consumers' home lives should not be tolerated and is a complete turnoff. If they insist on this practice, these institutions should be required to get prior approval, in writing, before their consumers are subjected to the practice.
